WISE WI-FI DAISY INTERFACE

Daisy Switches Configuration

-Go to Room and create Room, name it and choose Photo then do the following:

1. Tap "+" to add remote commands. Select the type of controlled device from the list.

2. Tap the transmitter to add.

3. Assign a "Name".

----- Add to Favourites

----- Enable if the receiver is Blue Series
----- Enable to set the timers

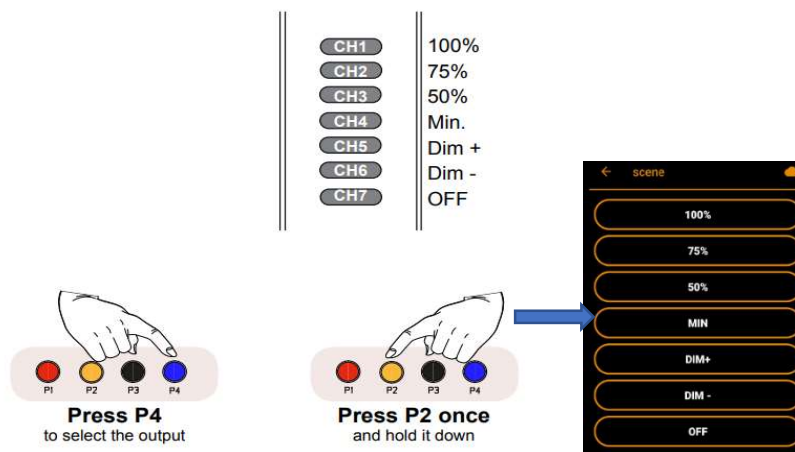

Once you finish from adding Switches then program them to any receiver (Wise Box, Scene, pack and so on) make sure timer is activated

Example

Programming Switch on App to Wise Scene Box as scene Switch

- Create 7 button Switch on App (Name the switch, Name buttons)
- Program the Switch to Wise Scene Box by pressing Blue Button once to make sure which channel you trying to program then two press on Yellow button on the box and hold on second press this should sound continuously, while you holding the button press the any button of 7 button switch on App

1- Select the output to associate by pressing the button **P4** (the selection will be indicated by the relative led ON).

2- Press the button **P2 once** and hold it down; the buzzer will sound a continuous beep.

3- During the beep sound press any button of the 7 channel transmitter to memorize; the memorization is indicated by the intermittent sound of the buzzer.

WISE WI-FI DAISY INTERFACE

Daisy accessibility

installation can be connected to more than one account. From the reset of the box you delete only the network information, rooms and devices will remain.

Follow this step:

- Create new account (confirm and login)
- Reset the Daisy box (press the reset button)
- Install the Daisy box with the new account (and find all devices)
- Remove the Daisy box from the previous account
- Link Daisy box to new account you should bring all memorised installation into new account.

WISE WI-FI DAISY INTERFACE

Problem	Solution
<i>First configuration procedure:</i> Blue and Red LEDs flashes alternately for long time	Wait until the LEDs stop flashing even if appear the message "Connection between board and phone failed". If the LEDs continue to flash, check that the router does not have filters blocks set.
<i>First configuration procedure:</i> Blue Led flashes slowly - Connection failed	Check that the data are correct and repeat the first installation procedure
<i>First configuration procedure:</i> GPS connection problem	Verify that the GPS function is enabled and set to high precision mode
<i>Normal operating mode:</i> Disconnection from the WiFi network: Blue and Red LEDs flashes alternately	Verify that the router is powered and connected to internet.
<i>Normal operating mode:</i> No internet connection - Blue LED flashes each 0.3s.	Check the router's internet connection
<i>Normal operating mode:</i> Emergency mode - Blue LED flashes each 0.1s.	Available only direct commands. Check the router's internet connection
<i>Timers are not functioning correctly</i>	Tap Synchronise button on Board setup Mode and make sure timers been activated and main timer page active as well This process can be done to improve timers' function
<i>Seen sign of cloud on top</i>	Daisy connected to cloud but no internet connection, check internet WIFI 2.4G connected to Daisy interface
<i>Daisy keep disconnecting from Wifi/ Router</i>	check Main Daisy Plug 1.2A which is the original with UK 3 pin converter, Check WiFi that is connected to Daisy is 2.4GHz not 5GHz.
