Parts needed to mount the STKO extrusion
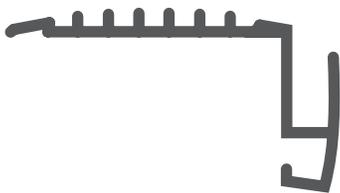

Extrusion (A)

End cap (B)

Silicone string (C)

LED Tape (D)

Tools needed for mounting:

- drill
- screwdriver
- glue

WARNING! All LED strips should be connected to a 12 V or 24 V power supply.

KLUŚ® Inspiring Solutions

1. Drill a hole in the the extrusion (A) where the power wire will be fed to the LED tape.

A
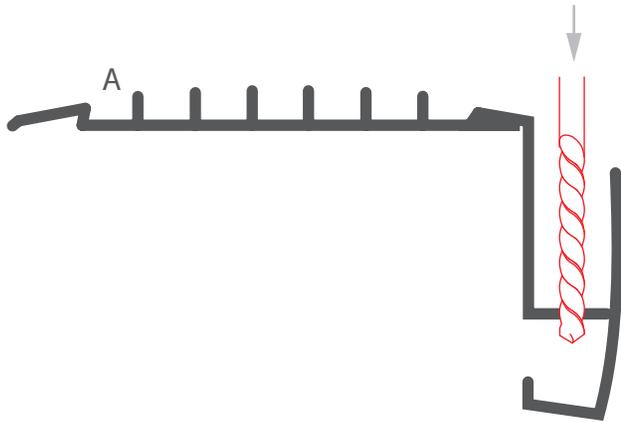

2. Mount the LED (D), then run the power wire through the hole drilled earlier.

D
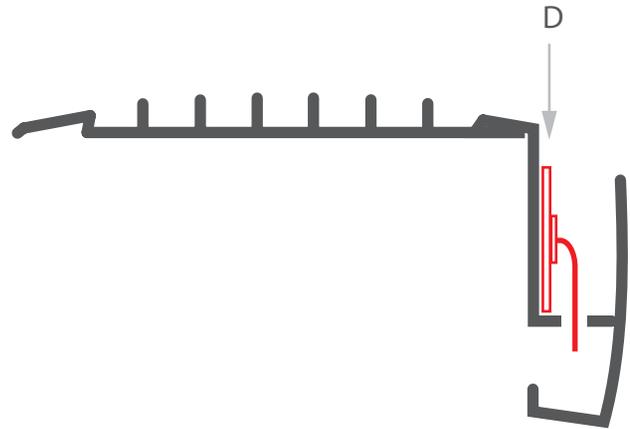

2. Fasten the extrusion (A) to the surface with appropriate screws for the substrate.

A
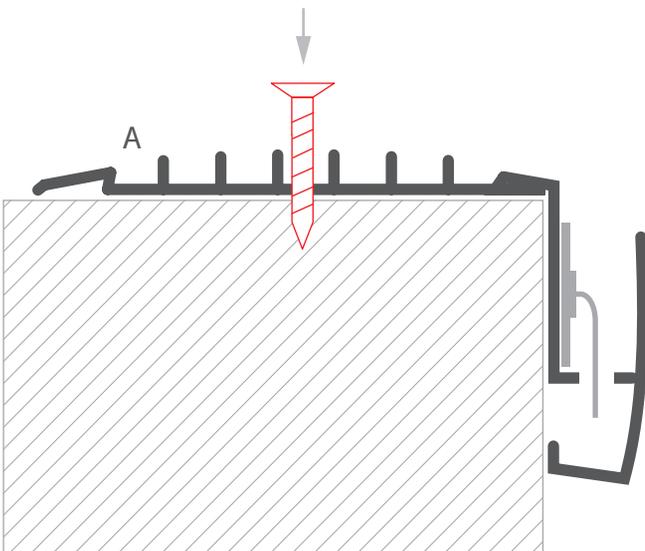

4. Insert the silicone string (C) into the extrusion above the LED tape.

C
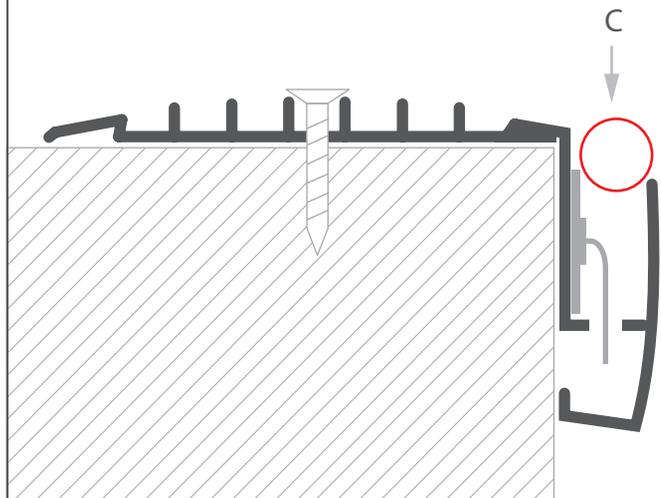

5. Glue the end cap (B) to the extrusion.
