WISEBOX

We are excited to celebrate 20 years of the Wisebox and are introducing Wisebox Four V4 and Wisebox One V2. This is the no.1 wirelessly controlled box in the UK. It has the same great features of wireless switching for lighting and controls. It now has the ability to add the Wise Wifi Direct Chip into the circuit board. Using the Wise Direct app you can now control the Wisebox directly from your phone, see the status of the lights, program time lag, and timers including dusk & dawn settings. We can't wait for you to try it!

Up to 200m Range

Controlled by wireless switches, remotes or PIRs

IP56, Suitable for outdoors

Control with your phone using Wise Direct or Wise Daisy

Preset Time-lag function

No software required

With New Wise Direct and Wise Daisy

DAISY

System Example...

BOX 1. ON/OFF
BOX 2. ON/OFF
BOX 3. CIRCUIT 1 - ON/OFF
BOX 3. CIRCUIT 2 - TIMELAG

Control Wise Box receivers,
using your smart phone at
home or away.

BOX 4. CIRCUIT 1 - ON/OFF
BOX 4. CIRCUIT 2 - ON/OFF
BOX 4. CIRCUIT 3 - TIMELAG
BOX 4. CIRCUIT 4 - ON/OFF

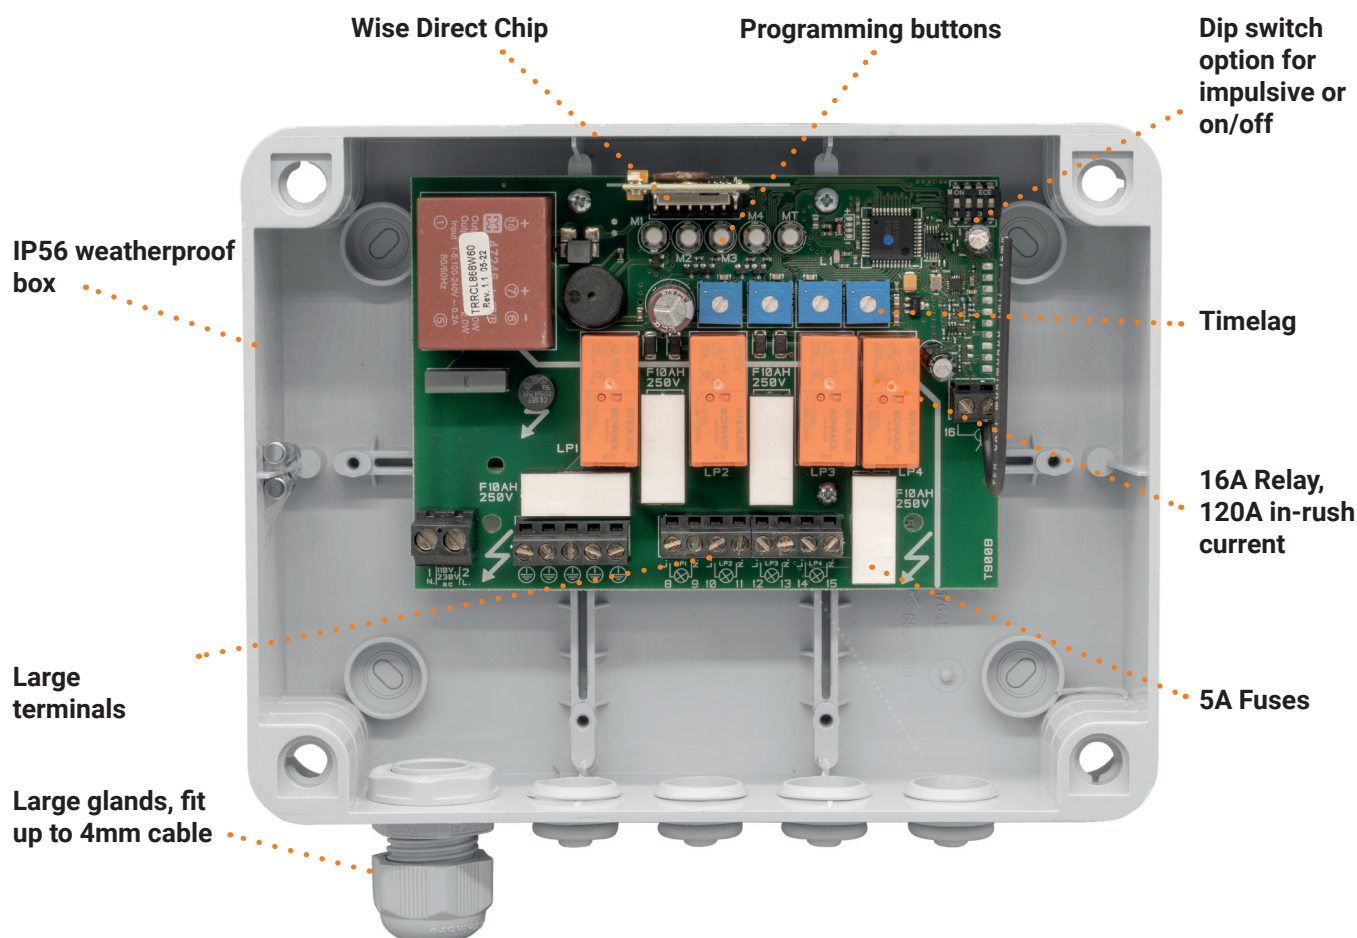

WISE BOX FOUR V4

The Wise Box Four receiver will control your lights, water features, electric shutters and gates etc. Once programmed, place the indoor wireless switch in a suitable location and the installation is complete. Enjoy switching your circuits from anywhere in your garden or home with the remote control.

It now has the ability to add the Wise Wifi Direct Chip into the circuit board. Using the Wise Direct app you can now control the Wisebox directly from your phone, see the status of the lights, program time lag, and timers including dusk & dawn settings.

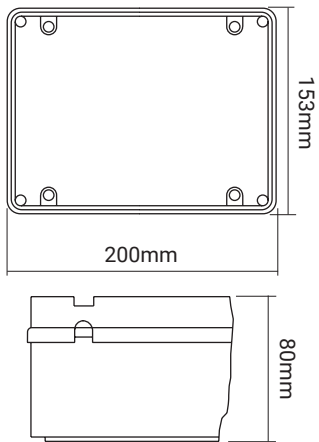

The Wise Box Four receiver has four fused 5 amp circuits with a maximum amperage of 20 amps across the whole box. Any circuit can be increased to 10 amps as long as the box itself doesn't exceed the 20 amp limit. The WiseBox receiver can achieve up to a 200m range with a clear line of sight. These circuits can be changed from switching to an open circuit.

The Wise Box Receiver Version 4 is an updated version of the original Wise Box Receiver. As well as the standard on and off mode, Version 4 features four PIR timer dials. There is 1 for each circuit, which will allow you to set times for our wired 2 channel PIR modules for sensor control.

WISE BOX TWO V2

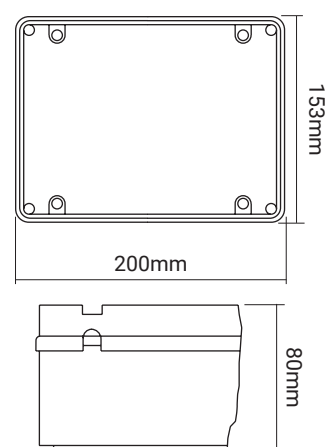

The Wise Box Two is a receiver that has three functions. The functions are on/off switching, push-to-make switching and timelag switching. The timelag function can be set to work between 1 second and 9 hours. This is very popular when installing lighting for communal hall ways and stair cases. As the switches are all wireless they can be placed anywhere with minimal effort.

The receiver has two 10 amp channels with a 200 metre range. These channels can be changed from switching to push-to-make. Each circuit on the box is fused individually with a 10 amp fuse to protect all the circuits.

It can be programmed in 4 different ways:

- Option A - Push-to-make
- Option B - Single Button Switching ON/OFF
- Option C - Two Button Switching ON/OFF
- Option D - Time Delay

Please note; Not compatible with Wise Direct

WISE BOX ONE V2

The Wise Box One is a one channel receiver that is controlled wirelessly. We have developed the Wise Box One Channel to place at multiple locations in one garden. The box is small, weatherproof, easy to mount and black, to blend into surroundings. The Wise Box One has advanced software for more flexible programming.

The Wise box unit will control your lights, water features, electric shutters and gates etc. Once programmed, place the indoor wireless switch in a suitable location and the installation is complete. Enjoy switching your circuits from anywhere in your garden or home with the remote control.

Compatible with Wise Direct & Wise Daisy

Set timers

Set for any day

Compatible with Wise Box Four V4 & Wise Box One V2

Now control your Wise Controls products using your Phone or Tablet, from anywhere in the world.

Wise Daisy Interface

WISEWIFI DAISY

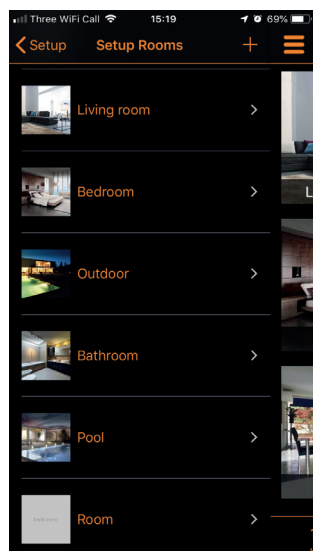

The Daisy Wi-Fi Interface is programmable from the Wise Controls App, to control all Wise Products remotely via smartphone. This works with both iOS and Android devices.

Innovative and easy to use: with a touch from a Smartphone or Tablet. You can activate and program the operation of all the installed automations, individually or in groups; adjust the intensity / switch on / off the lighting automatically or manually; create multiple scenarios and recall them at any time.

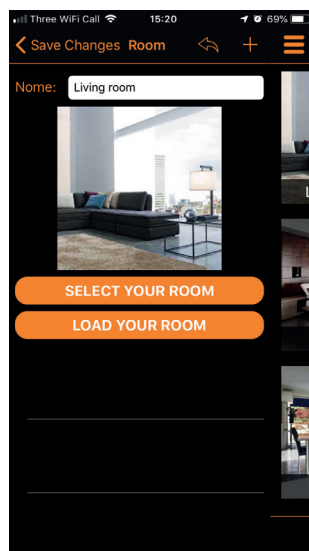

- Daisy allows you to easily communicate with all the automations from anywhere in the house, even remotely, with Smartphone or Tablet.
- Simple scenario creation and scheduling of weekly timers.
- Allows you to control devices from multiple users.
- Possibility to check the status of the blue series devices.
