#### Add Manually -WiFi device - default mode

Step 3 73 Confirm light bulb is now rapidly flashing

### Add Manually– WiFi device-Configuration

In a selected mode, clicking confirm button on the page when the indicator light flashes rapidly/slowly will bring up WiFi password page. Select the Wi-Fi in the work area of a device that can enable successful Internet connection, enter the Wi-Fi password, and click "OK" to proceed to configuration. Successful configuration will appear as showing below. Names of devices that have been configured successfully can be changed, and the locations of the rooms where the corresponding devices are can be selected.

### **Control Devices - Individual Control**

Open the control panel for devices, only the timer can be accessed in the off mode and scene, colour, brightness, and schedule can be configured in the on mode. Click "..." at the top right corner of the control panel to manage individual devices.
