Dimslim T5 - Dimming saves £££s!

The new 'DA02V10' 0-10V Dimslim Interface is the new revolutionary pack from Mr Resistor which makes our DimSlim Fluorescent fittings 0 - 10V, allowing them to be dimmed by many well known and respected dimming systems such as Lutron, Leax, Rako, and Wise Controls. The interface allows 20 DimSlim fittings to be connected to it in two rows of 10.

A booster is available to allow an extra 2 rows of 10 DimSlim fittings if needed.
