DA02DALI Feelux Dali Interface

FEELUX

The **NEW Feelux Dali Interface** enables you to dim any Feelux fittings using any Dali dimming controls.

Each channel can have a maximum of 10 fittings connected with a maximum combined wattage of 600W. A Booster is available if more wattage is required. The interface has two addresses that are automatically assigned by the Dali control system.

The Feelux lighting products are used for linear lighting. They are designed with plug 'n' play leads and an integral ballast for simple installation. The simple assembly reduces the installation time by at least 75%.

Works with these Feelux Products...
