LED EXTRUSION

CATALOGUE

KLUŚ[®]

Mr Resistor is a lighting specialist established in 1968.

We supply a huge range of Klus LED extrusions to create lines of light using LED tape.

Extrusions house LED tape, keeping it cool and giving protection. These diffusers help to create seamless lines of light, reducing visible LED spots. They help to give a professional finish to any project.

We stock extrusions for any requirements including recessed extrusions, surfaced extrusions, ceiling extrusions, walls, cabinets, stairs, floors and more.

This catalogue will guide you through our range of extrusions, exploring the huge variety of effects that can be achieved using these products.

EXTRUSION DIFFUSER 2M THICK FROSTED CODE : DIFF LIGER 2.07F

The Extrusion Diffuser is used in conjunction with all Maxi Extrusions. It is required to diffuse the tape light and give an even glow on surfaces.

MAXI SURFACE ENDCAP CODE : MAXI U END

The Maxi Surface End Cap seals up the furthest end of the extrusion to ensure dust cannot enter the fitting interfering with the electrical components inside. Only 1 end cap is required for each circuit of Tape light.

MAXI SURFACE POWER END CODE : MAXI U POWER END

The Maxi Surface Power End Cap seals up the starting end of the extrusion, whilst leaving a small hole to allow a cable to be inserted through to the first piece of tape light. Only 1 power end is required for each circuit of Tape light.

MAXI AND MICRO EXTRUSION CLIP CODE : MICROMAXI CLIP
MAXI AND MICRO EXTRUSION CONNECTOR CODE : PD MICRO

The Extrusion Clip is used to mount or connect Maxi and Micro Range of Extrusions. Use 2 - 3 clips every meter to ensure your extrusions stay in place.

C. HIGH BRIGHTNESS 50

E. DYNAMIC WHITE 51

MAXI ADJUSTABLE CLIP CODE : REG-PD

A mounting bracket used for mounting extrusions to the surface which also enables light angle adjustment of the lighting fixture.

MICRO SWITCH 1491 CODE : MICRO SWI 1491

The LED micro switch for easy control of your tape light fixtures. Because the switch is typically mounted at the end of a run, end caps are needed to ensure that everything seals cleanly.

MOUNTING BRACKET CODE : PL-PDM CLIP

The PL-PDM Mounting Bracket enables connection of profiles in a single line of any length to create a spectacular line of light. 3 mounting brackets are needed per metre.

CABINET & SHELF EXTRUSION MICRO

Intended mainly for interiors, e.g. lighting of cabinets, stairs, display windows etc. With their small size, the lighting fixtures can be concealed in the walls of the furniture with small cross-sections.

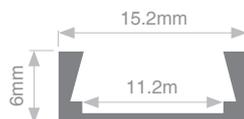

Available in black and white versions upon request.

Lipod couplers are assembled short sections of profiles in the specified shapes. Couplers are used to build linear fixtures composed of different multi angle systems from 90 to 135 degree angles.

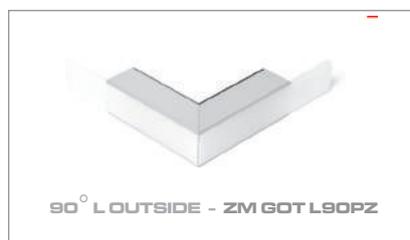

Covers associated with the Lipod couplers extend out 40 mm past the coupler to help stabilize the connection to the extrusion. The Lipod couplers connect to the extrusions with the help of the connectors

Advantages

Simplifies and quickens mounting of the chosen aluminium profiles, in unconventional, multi angle systems. The coupler allows you to obtain a uniform line of light.

CEILING & WALL EXTRUSION PDS ZM

The PDS ZM is a small-sized extrusion made of high quality aluminium and designed for universal applications. A seamless line of light can be obtained with the use of our seamless LED Tape and a Liger diffuser.

Side surfaces of the extrusion are smooth, without heatsinks. There are grooves on top which enables you to connect extrusions into extended polygonal lighting fixtures. ZM connectors embedded in the extrusion enable you to connect individual parts. The suspension of the fixture is achieved using fasteners.

For Exterior Use - mounting to different types of pavements, sidewalk surfaces, bike lanes, parking lots etc. (designed to meet IP67 waterproof level)

2M CODE : LINE U ALU 2.07M

LINE U RECESSED EXTRUSION - ACCESSORIES

EXTRUSION DIFFUSER 2M CODE : DIFF LINE 2.07M

The Line U Extrusion Diffuser is made of glass and can only fit onto the Line Recessed Extrusion. This glass makes the top of the extrusion flush with the surface its been recessed into, as well as stopping small particles of dust interfering with the electrical components.

LINE U END CODE : LINE U END CAP

The Line U End Cap seals up the furthest end of the extrusion to ensure dust cannot enter the fitting interfering with the electrical components inside. Only 1 end cap is required for each circuit of Tape light.

LINE U POWER END CODE - LINE U POWER END

The Line U Power End Cap seals up the furthest end of the extrusion, whilst leaving a small hole to allow a cable to be inserted through to the first piece of tape light. Only 1 power end is required for each circuit of Tape light.

LED TAPE

A. TAPE 120 SEAMLESS

Tape 120 is designed to give a uniformed line of light, due to the leds being closer together than other LED tapes.

We recommend using the Liger extrusion diffusers alongside it to give a seamless result.

- More LED chips
- LED chips closer together
- IP65 - Dust tight. Protection from water projected from a nozzle.

LED TAPE

B. TAPE 240 ULTRA SEAMLESS

Tape 240 is designed to give our best line of light, ideal for shallow extrusions.

We recommend using the Liger extrusion diffusers alongside it to give a seamless result.

- More LED chips
- LED chips closer together
- IP65 - Dust tight. Protection from water projected from a nozzle.

D. TAPE IP68 WATERPROOF

Tape IP68 is designed for to be used in wet areas such as bathrooms and outdoors.

It is watertight and can be installed submerged in water.

- IP68 - Dust tight. Protection against complete, continuous submersion in water.
- High Brightness LEDs

LED DRIVERS

TRIAC LED DIMMING DRIVERS

The Triac LED Dimmer Driver is a LED power supply suitable for 12V/24V DC LED's. This driver is used with LED Strip. This driver can be connected to any normal mains dimmer or switch. It is compatible with both leading and trailing edge dimmers.

12V DRIVERS

100W : DIMDRIV2 24V100W

120W : DIMDRIV2 24V120W

200W : DIMDRIV2 24V200W

The Triac LED Dimmer Drivers work with all standard dimmers and all the biggest control systems on the market, including Lutron, Wise Controls and Rako.

WISE CONTROLS RECEIVERS

The Wise Dimming Receivers are dimmers that are controlled by Wise wireless switches. The receivers allow you to dim LED tape, scene set and colour change.

WISE SCENE/DIMMING RECEIVER : WISESCENE STRIP

- A. TAPE 120
- B. TAPE 240
- C. TAPE HIGH BRIGHTNESS
- D. TAPE IP68
- G. TAPE SIDE EMITTING

WISE DYNAMIC WHITE RECEIVER : WISEDYN STRIP

WISE CHAMELEON RGB/W MASTER RECEIVER : WISERGBW V2 M WISE CHAMELEON RGB/W SLAVE RECEIVER : WISERGBW V2 SL

- F. TAPE RGB/WHITE

WISE CONTROLS KEYPADS

Wireless switches can be used to control any of the receivers in the Wise Controls range. The function of the switch, and each of its buttons, depends upon the function of the wireless receiver it is programmed to. Therefore a single button can be used for a variety of functions including, but not restricted to, on/off, on/off and dimming, or master off only.
