Introduction

Lighting control refines and finishes every beautiful space. Lutron keypads complete the experience, delivering an aesthetic, inviting, and intuitive control to ensure the perfect light for everything you do.

Lutron offers a wide variety of colours, styles, finishes, and functions to help you create an environment that reflects your unique sense of design. Browse through our keypads brochure to select controls that best complement and coordinate with everything in your home or business.

Aesthetic Styles

Like other fixtures and fittings in your home, lighting and blind controls play an important part in the design of any room. We offer a wide range of keypads to provide attractive, intuitive control in wall-mounted and tabletop designs.

Colour, finish, and aesthetic options are illustrated in the following pages, along with information on product features. For specific information about available product colours and finishes, please see pages 26-27.

Architectural seeTouch Keypad

Architectural-style keypads feature beveled edges and precise corners.

- Large, easy-to-use, rounded buttons
- Illuminated button labels are easy to read day or night
- Custom engraving personalises each control
- Contact closure inputs allow occupancy sensor integration

International seeTouch Keypad

The International seeTouch keypad provides elegant, intuitive lights and blind control.

- Large, easy-to-use, rounded buttons
- Illuminated button labels are easy to read day or night
- Custom engraving personalises each control
- Contact closure inputs allow occupancy sensor integration

Signature Series Keypad

A slim, elegant solution, Signature Series keypads incorporate lighting control into standard size millwork.

- Large, easy-to-use, rounded buttons
- Illuminated button labels are easy to read day or night
- Custom engraving personalises each control
- Contact closure inputs allow occupancy sensor integration

RF seeTouch Tabletop Keypad

seeTouch tabletop keypads allow your client to have total home control from wherever it's convenient, such as bedside or countertop locations.

- Large, easy-to-use, rounded buttons
- Illuminated button labels are easy to read day or night
- Custom engraving personalises each control
- Operates on batteries or with a plug-in transformer

Architectural seeTouch

Signature Series

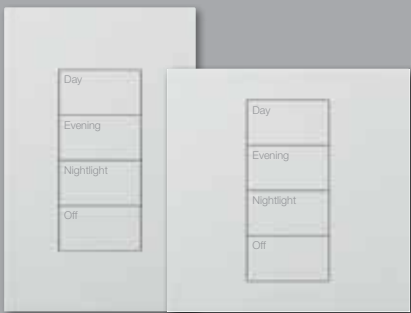

RF seeTouch Tabletop

Aesthetic Styles

Palladiom Keypad

The Palladiom keypad offers a beautiful architectural aesthetic with sleek minimalistic design.

- Buttons and faceplates are made from the same material for a coordinated look
- Large easy-to-use buttons
- User customisable, backlit text makes the keypad easy to read and provides scene status to the user
- Available globally in two styles — rectangular and square
- International (square) versions available with one or two columns
- Faceplates and buttons are available in matte plastic, metal, and glass finishes

Palladiom US & International

Architrave Keypad

Architrave keypads offer another option for incorporating your keypads into door jambs and other millwork where traditional keypads will not work.

- Custom engraving below each button personalises each control
- Small LEDs beside each button show lighting status

Architrave

GRAFIK T Slider

This architectural touch slider establishes a new language for lighting control.

- Simple and intuitive touch control adds style to any space
- Provides local zone control of any lighting load type
- Available in Architectural matte, metal, and glass finishes

GRAFIK T Slider

Pico RF Wireless Control

Versatile Pico wireless control can function as a lightweight handheld remote, a stylish tabletop control, or a wall-mounted keypad.

- 2 or 3 button models with and without raise/lower capability
- Large, easy-to-use buttons
- 10-year battery life
- Models available with icons or labels for lights and blinds

Pico Wireless

Wallbox Closure Interface

You can still use your favourite keypad with a Lutron system thanks to our Wallbox Closure Interface (WCI). Please see page 25 for details.

Architectural seeTouch Keypad

Characteristics

Dimensions:	Front 70 mm x 116 mm (2.75 in x 4.56 in) Side/depth 27 mm (1.06 in)
Wired	Yes
Wireless	No
IR options	Yes
Button configuration	Up to 7
Status lights	Yes
Backlit buttons	Yes
Custom engraving	Available
Backbox type	Standard U.S. backbox

Standard configurations available

Custom* configurations are also available.
Models are available with or without an insert as shown on the opposite page.

* Not all configurations are available for all product lines. Refer to individual product line specifications.

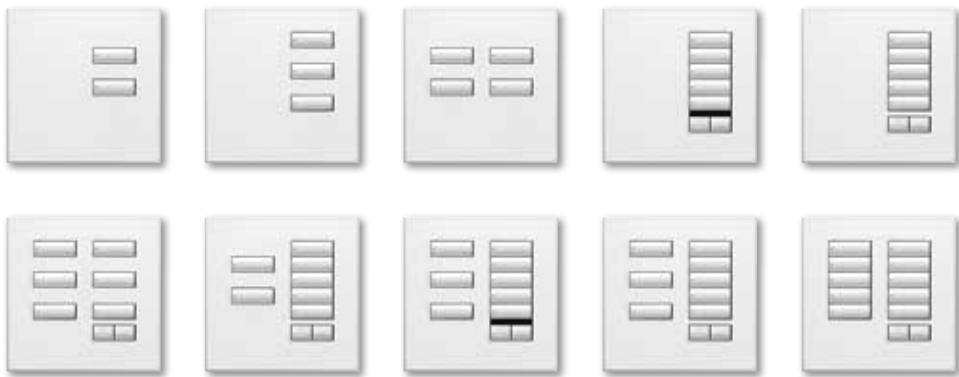

International seeTouch Keypad

Characteristics

Dimensions:	Front 86 mm x 86 mm (3.50 in x 3.50 in) Side/depth 28 mm (1.13 in)
Wired	Yes
Wireless	No
IR options	Yes
Button configuration	Up to 10
Status lights	Yes
Backlit buttons	Yes
Custom engraving	Available
Backbox type	Standard UK square or European round backbox 35 mm deep minimum

Standard configurations available

Custom* configurations are also available.
Models are available with or without an insert as shown on the opposite page.

* Not all configurations are available for all product lines. Refer to individual product line specifications.

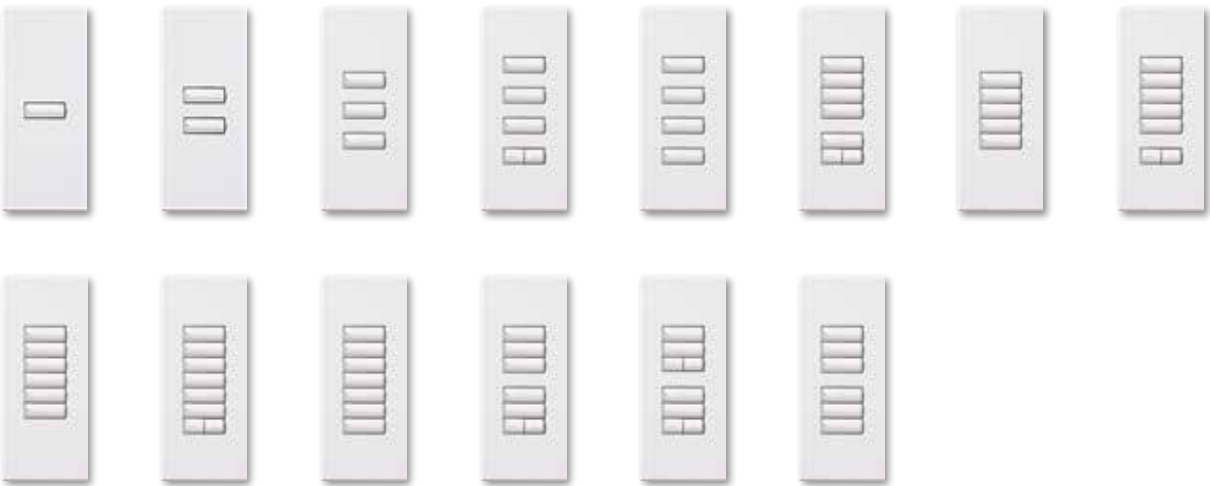

Signature Series Keypad

Characteristics

Dimensions:	Front 46 mm x 121 mm (1.80 in x 4.75 in) Side/depth 41 mm (1.62 in)
Wired	Yes
Wireless	No
IR options	No
Button configuration	Up to 7
Status lights	Yes, green or blue available
Backlit buttons	Yes
Custom engraving	Available
Backbox type	Signature Series backbox (sold separately) 113.03 mm (high) x 39.37 mm (wide) x 71.12 mm (deep) (4.45 in x 1.55 in x 2.8 in)

Standard configurations available

Custom* configurations are also available.
Models are available with or without an insert as shown on the opposite page.

* Not all configurations are available for all product lines. Refer to individual product line specifications.

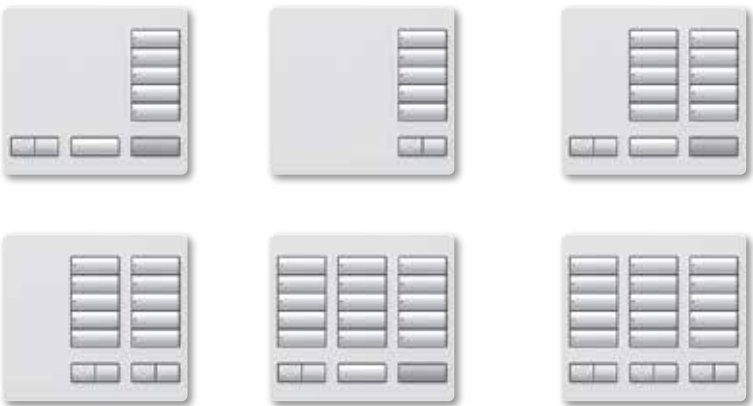

RF seeTouch Tabletop Keypad

Characteristics

Dimensions:	Front 91 mm x 82 mm (3.56 in x 3.25 in) Side/depth 25 mm (top) – 18 mm (base) (1.00 in – 0.75 in)

Custom engraving

As a finishing touch, you can add custom engraving. Text, icons, and images are all possible.

Icons and images

We have created a set of icons for engraving. You can choose from these or send us an original.

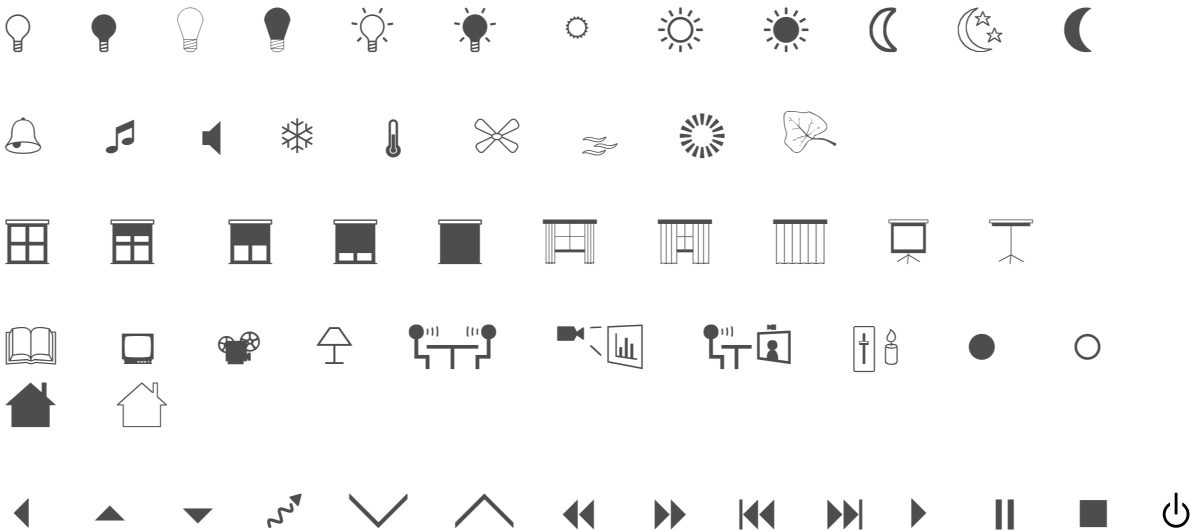

Instead of using words to describe the functions of each button, the customer chose to use icons.

You can also use an existing image or create a new one to place on the faceplate of the control. Common customisations include company logos.

This control features decorative faceplate engraving that was specifically designed to complement the room's décor.

Our laser-engraving capabilities include the following icons in either dark grey or white text.

Fonts and languages

The engraved font can be changed from the standard Helvetica to nearly any font, including characters from any language.

Engraving guidelines

For images and icons, files must be provided in .dxf or high-res .pdf format. In some cases, images and icons may need to be resized to fit appropriately on a button or faceplate.

For custom fonts, you can provide true-type font files or request a font by name.

Custom controls

Lutron controls have always been well known for their beautiful aesthetic, intuitive nature, and variety of standard choices. For projects that require specific design elements, or an exceptionally high degree of detail, Lutron can help you create a unique control for each and every space.

Customised design features

- Faceplates can be customised to cover other devices
- Custom button shapes and sizes available
- Custom colours and finishes available
- LED colour options available for some controls

To discuss potential options on how a control can be designed to meet your needs, please contact your local Lutron representative.

You can download our Custom Controls brochure (367-1753) from our website, lutron.com/europe.

Custom faceplates and buttons

The faceplate and buttons are the most noticeable components of a Lutron control. You can customise or create a faceplate and button to meet your design requirements.

We can also provide controls with buttons that are unique in size or shape, or that have a reduced number of buttons.

Custom bases

We can create control bases in many materials, sizes, and shapes to accommodate nearly any space and design. Customisation can include converting a standard wall control to a tabletop control

Speciality controls

The Custom Controls Group can customise Lutron wallstations to change their basic functionality, configuration, or aesthetics to meet a specific application. Some limitations apply; please contact Lutron Customer Service for details.

What we can customise – This faceplate was created to fit over a third-party thermostat and a Lutron keypad

Round button Architectural seeTouch keypad.

Contact-closure control with seeTouch buttons.

Eight-scene IR remote control with custom metal finish.
