MR. RESISTOR®
Lighting Specialist Est. 1968

Seamless Introduction

Mr Resistor has created a new range of seamless lighting, displayed in our new Seamless demo room at our Wandsworth showroom. Many of the lights have been designed to be recessed and plastered into the wall and ceilings, to give a discreet modern look. We supply a large variety of seamless lighting including trimless downlights, plaster wall lights, invisible low level lights and extrusions for LED tape and fluorescent strip lighting.

Seamless Contents

Seamless **Downlights** : Page 01 - 08
