

A photograph of a modern interior space with large glass doors and windows overlooking a garden at night. The interior features a wooden dining table with red chairs, a white countertop, and a dark green cabinet. The garden outside is illuminated with string lights and has a wooden fence and a tree.

WISESCENE

The Wise Scene Box is a 4 circuit dimmer that is controlled using wireless keypads. This box has been designed to dim LEDs, with smooth dimming and no flicker. You can override the primary dimming function and create just switching circuits.

The Wise Scene Box is easy to install with simple mounting to any wall. The wiring is fast with large input terminals and a dedicated terminal for each circuit. The box is IP56 waterproof rated for inside the home or outside in the garden. Multiple boxes can be installed in the same home/garden to create a complete system for controlling your lighting.

The Wise Scene Box has many programming options giving you huge flexibility. You can choose single buttons for on/off and dimming to full scene setting using the wireless keypads plus many more options. Multiple keypads and remotes can be used to control the lights from different positions.

We have implemented a very straight forward way of changing the pre-set scenes. No software is required. This gives you the option to adjust your scenes to your preference without the need of a programmer. All options can be controlled on your phone, or smart speaker using the Wise Daisy.

- Can be programmed to dim or switch
- Master OFF
- Simple wiring to box
- IP56, can be installed inside or outside
- Switches require no wiring
- 100 metre range
- 4 circuits each box
- 240V, 2000W (4 x 500W or 4 x 150W for LED)

Scene Box Overview

Installation

*The Wise Scene Box can
Dim or Switch
the following load types...*

Mains Voltage
LED Lamps

Constant

LIGHTING

Control Options

The Wise Scene Box can be programmed in many different ways, from scene setting, dimming and switching through to time-lag and sensor control, using our wireless keypads. Below are the different options;

Option A - 7 Button Scene

Option B - 4 Button Scene

Option C - Single Button Dimming

Option D - Three Button Dimming

Option E - Switching ON Only

Option F - Switching OFF Only

Option G - Single Button ON/OFF

Option H - PIR / Time Lag

OFF	2.5 MINUTES
15 SECONDS	5 MINUTES
30 SECONDS	10 MINUTES
60 SECONDS	20 MINUTES

Option I - Daylight Sensor

OPTION K

New V2 Option - Master (raise & lower)

(see page 15)

Option J - Wise Daisy Wifi Hub

USING WISE DAISY WIFI HUB, CONTROL YOUR LIGHTING WITH SMARTPHONE

Options can be paired to different button keypads than shown

System Example

Programming

- Quick and easy scene programming
- Easy to adjust scenes
- No software required
- Up to 64 keypads, 256 scenes
- No addressing
- Possible to pair keypads to multiple scene boxes

WISE DAISY

Now control your Wise Controls products using your Phone or Tablet, from anywhere in the world.

The Daisy Wi-Fi Interface is programmable from the Wise Controls App, to control all Wise Products remotely via smartphone. This works with both iOS and Android devices

Wise Daisy Interface

WISEWIFI DAISY

Innovative and easy to use: with a touch from a Smartphone or Tablet. You can activate and program the operation of all the installed automations, individually or in groups; adjust the intensity / switch on / off the lighting automatically or manually; create multiple scenarios and recall them at any time.

- Daisy allows you to easily communicate with all the automations from anywhere in the house, even remotely, with Smartphone or Tablet.
- Simple scenario creation and scheduling of weekly timers.
- Allows you to control devices from multiple users.
- Possibility to check the status of the blue series devices.
