### Specification

Construction	Aluminium
Wattage	15W
Head Diameter	154mm
Head Length	165mm
Body Length	316mm
Total Height	300mm
Voltage	240V

## Energy Saving LEDs

Why pay expensive energy bills when you can pay a fraction of the cost with no loss of light? The answer is LEDs.

The lamps will also save you money as the 50,000 hour life means regularly changing bulbs is now a thing of the past.

Tungsten Filament lamps are to be universally phased out over the next 10 years, so upgrading to either LEDs or other low energy lamps is a must.

This 15W fitting has roughly the same lumen output as a 75W halogen spotlight so instantly you are saving money, energy, and more importantly the environment.

LEDs...Saving the World
