

SOUND TO LIGHT

SOUND TO LIGHT

Introducing a revolution in LED colour change lighting: the sound to light lamp. A sensor in these RGB LED lamps converts the rhythm of your music into pulses and flashes of light. Creating disco lighting at home couldn't be easier. Simply fit the lamps into your existing fittings, turn up the music and get ready to party.

An Infra Red remote control is provided with each lamp for easy adjustment of brightness, colour and for switching between one of two music control settings. The lamps are designed to retro fit in your existing GU10 and E27 mains voltage fittings. Sound to Light : join the revolution.

Colour Option

	Color	Wavelength	Lumex Flux
Red	1100	635nm	21 lm
Green	2200	525nm	42 lm
Blue	3300	460nm	18 lm

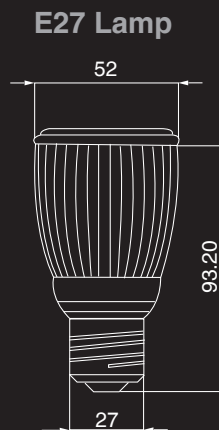

Power Specification

Power Voltage	100-240VAC
Power Supply Current	<500mA
Power Consumption	5W
Operating Life	30000 hours

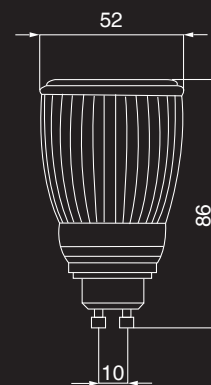

Operation Temperature	-20-50 °C
Music Working Condition	>70 dB

Product Code

KARAOKE E27

GU10 Lamp

Product Code

KARAOKE GU10
